Software Developer

Full Stack Software Developer with 2+ years of experience building web and mobile applications using Angular, Ionic, Node.js, and TypeScript. Experienced in developing REST APIs, integrating payment systems, and deploying applications to Android, iOS, and cloud platforms. Strong background in scalable web architecture, database management, and modern JavaScript frameworks.

WORK EXPERIENCE

Freelance

02/2024 – 12/2025

Full Stack Software Developer

- Developed secure payment and transfer systems using Paystack APIs, enhancing transaction reliability and user trust within 3 months.
- Developed a trading application with real-time data visualization using Angular and Ionic.
- Built backend services using Node.js and REST APIs to support mobile and web clients.
- Improved application responsiveness and performance for real-time financial data processing.

Alchemy Asset Management

01/2023 – 07/2025

Full Stack Developer

Midrand

- Developed and maintained a web-based ordering and payment system integrated with PayPal.
- Built REST APIs using Node.js for authentication, payments, and data processing.
- Integrated Zoom API services for meeting scheduling and login automation.
- Deployed applications to Android and iOS app stores using Ionic and Angular.
- Hosted and maintained backend infrastructure using Render and Afrihost.
- Collaborated with cross-functional teams to deliver full-stack web solutions.

SKILLS

Programming Languages: C#, CSS, HTML, Java, JavaScript, Python, TypeScript

Frameworks and Technologies: Angular, ASP.NET, Bootstrap, Firebase, Ionic Framework, .NET, Node.js, REST APIs

Tools: Android Studio, Figma, Git, GitHub, Hyper-V, Linux, Microsoft Azure, Microsoft Excel, Microsoft Office, Microsoft Office 365, Microsoft Visual Studio

OS: Linux, Microsoft Windows

Databases: Microsoft SQL Server, MongoDB, MySQL, NoSQL

Soft Skills: Conflict management skills, Good communication(writing and oral) skills, Problem solving skills, Team leader skills

Artificial Intelligence: AI-assisted Software Development, AI Code Generation, AI-powered Debugging, ChatGPT, GitHub Copilot Chat, Large Language Models (LLMs), Prompt Engineering, Technical Documentation

Hobbies: Machine Learning, Modding Games, Open Source

EDUCATION

Bachelor Of Computer And Information Sciences In Application Development

IIE Varsity College

Midrand, Gauteng, South Africa • 03/2020 – 12/2022

CERTIFICATIONS

Full Android 11 Masterclass Course

12/2021 – 06/2022

Oak Academy

AZ-900

12/2021 – 04/2022

Microsoft

PROJECTS

South Side Navigation App

Technologies: Java, Firebase, Google Maps API

- Built a navigation application for South African users to locate landmarks.
- Implemented Firebase authentication and real-time database features.
- Integrated Google Maps API for geolocation and navigation services.

GitHub: github.com/ntokom89/OPSC_South_Side_APPLICATION

.NET Dewey Decimal System

Technologies: C#, .NET WPF, SQL Server

- Developed a library management system based on the Dewey Decimal classification.
- Applied object-oriented programming and database integration.

GitHub: github.com/ntokom89/.Net-Dewey-Decimal-System

.NET Farmer Management System

Technologies: ASP.NET, C#, SQL Server, Azure

- Designed a web system allowing farmers to manage products and inventory.
- Implemented CRUD functionality and role-based access for employees.

GitHub: github.com/ntokom89/FarmerManagement-.NET

AWARDS & SCHOLARSHIPS

Hackathon

11/2022
